Clinical research starts functioning

A clinical research centre of Manipal AcuNova, India's largest clinical trial organisation, began functioning at Whitefield here on Monday. GE Healthcare chairman William Castell inaugurated it.

The new centre, named Asia Clinical Research Centre, will carry out clinical drug development and drug discovery research. It also houses a central research lab, radiology core lab and a cardiac safety monitoring lab. The centre also would have 150 professionals. D.A. Prasanna, vice-chairman and managing director of Manipal AcuNova, presided over the meeting. •ENS
